CorroFix RM (Repair Mortar)

Fiber reinforced concrete repair mortar

Features and benefits

- dry mortar
- acc. DIN EN 998-2
- no sagging up to 100mm thickness per step
- water resistant
- fiber reinforced
- fast setting
- high loadable
- high bonding to substrate
- salt resistant
- good resistance to acids and alkalis
- sulphate resistant

Description

CorroFix RM is a cement based, shrinkage-free, fast setting, fiber reinforced and light swellable repair mortar based on special cements, additives and aggregates according DIN EN 998-2 mortar class M30. CorroFix RM adheres and bonds perfect to nearly all absorbend mineral surfaces and is water, frost and salt resistant.

Field of application

This repair mortar is used for renovation and sealing against pressurized and capillary water. For general concrete repair up to 100mm thickness and a fire resistant mortar.

Surface preparation

The surface has to be solid, stable, clean. Loose components, release agents, formwork oil, grease must be removed prior to application of CorroFix RM mortar. The surface must be humid or pre-wetted if necessary. Standing water must be avoided.

CorroFix RM is mixed with water (4 ltr per 25kg unit) to a homogeneous lump-free material. The water amount can be slightly adjusted up on requirement. Put the mortar in a clean bucket add water while mixing in parts till a thixotropic consistency is achieved. Minimum mixing time is 3 minutes.
